

Dear Sir/Madam,

As a long-term admirer of the work done by the team at Ghana Armed Forces, I am delighted to submit my application for the Information Technology technician position. As a graduate from Ghana Communication Technology University with BSc. Information Technology, I am confident that my knowledge of computer systems, experience in backend coding, computer networking and attention to detail would make me an asset to the team at Ghana Armed Forces.

In my former role as a national service worker at the Ghana Armed Forces (Directorate of Information Technology) Technical Services department, I was responsible for developing three different kinds of system. While employed there, I assisted in the development of Officers on course monitoring system, clearance management system and finally inventory management system, each of these systems has it function performing in the Ghana Armed Forces. I am sure that this experience will help me pick up new skills and quickly excel as a technician at your firm.

While in Ghana Communication Technology University, I focused more on programming which helped me built a geolocation for class attendance app for the university. The Information Technology technician position at firm would be an exciting opportunity for me to bring my educational and professional background to the table and learn more about the industry.

I have attached my curriculum vitae, which further details my skills and educational background. Please feel free to contact me for any clarifications or to schedule an interview. I look forward to the working with you at the Ghana Armed Forces.

Thank you for your time and consideration.

Yours Sincerely,

IsaacTotimeh.
